

INTERFLON FIN GREASE

Transparent, multi-purpose grease with MicPol® technology

Transparent and odourless lubricant in a handy aerosol. For extended periods of maintenance free service. Formulated using MicPol® technology to form a tough durable film that prevents metal-to-metal contact and seal out water and contaminants to lubricate even under the most demanding conditions.

1 product that replaces up to 7 conventional products:

- Assembly Grease
- Adhesion Grease
- Chain Grease
- White Grease
- Spray Grease
- Battery Terminal Grease
- Open Gear Grease

When combined with Interflon Fin Super, this replaces nearly all the products you use for maintenance.

MULTI-PURPOSE

WATER RESISTANT

Applications:

- Bearings
- Hinges
- Spindles
- Gudgeons
- Cables
- Valves
- Screw Connectors
- Chains

INTERFLON FIN GREASE

Transparent, multi-purpose grease with MicPol® technology

Clear white penetrating grease, economical, aerosol can spray in every position. Suitable for a myriad of applications in small- medium enterprises, industrial sites and food processing environments.

Distinctive Properties:

- Extended lubrication intervals
- Excellent penetration properties
- Water and steam resistant
- Prevents dirt, dust and water ingress
- Lower grease consumption
- Does not damage rubber or plastics
- Reduces costs by lowering wear of machine parts

Practical example:

Lubrication of gear and rack of machine for packing potatoes

The gear grease used previously attracted dirt and dust. The mixture of grease and dirt hardened to form a strong abrasive paste on the surfaces. Furthermore, the grease was not NSF listed.

Our solution

Interflon Fin Grease

Result:

After cleaning with Interflon EM30+ Degreaser and Interflon Metal clean, Fin Grease was applied to the gear wheels and does not harden and creates a clean, transparent, lubricating film doubling the lubricating interval

Annual savings of £9600
