

Multi-purpose grease with MicPol® technology

Exceptionally long lasting grease with MicPol® technology. For the lubrication of almost any mechanical part of (food stuff) machinery, outdoor equipment, vehicles etc. With slow to medium fast movements and high loads over a medium-high to very low service temperature range.

Highly resistant to water, chemicals and other common forms of industrial soiling. To seal machine parts with slow to moderate movement. For virtually all types of loads and medium to very low ambient temperatures.

Key Advantages:

- Suitable for use in HACCP environments (NSF-H1)
- High resistance to water, steam and dirt
- Excellent protection against corrosion
- Does not damage rubber or plastic

Applications:

- Open Gear Wheels
- Shafts
- Guide-ways
- Electric Motors
- Valves
- Pin and Bush Couplings
- Bearings
- Many more...
